

The background of the page features two distinct metal mesh patterns. The upper portion shows a close-up of a brown, diamond-shaped mesh, likely made of metal, with a textured, slightly irregular appearance. Below this, the background transitions to a lighter blue mesh, also with a diamond pattern, which appears more uniform and is set against a white background. The text is overlaid on the blue mesh section.

Metal Work Wire Technology & Development

Founded in 1936, Ishikawa Kanaami is a leading company in the metallic mesh and punching metal industry.

Inherited originality and ingenuity, and passion for development

Since its foundation, Ishikawa Kanaami contributes to the industry as an expert company who can provide the metallic mesh in both experimental production and mass production. We have shifted to “high-mix low-volume production” to meet the diversified needs from the customers. We will continue trying to be a leading company in the next century and work toward making high quality and high precision products with our advanced technology.

With an enhancement of facility and materials (hardware), and accumulation of technology (software), we can provide our products with a top quality.

Excellent products manufactured by supersensitive technology

Tremendous technological development in recent years and the diversified needs toward metal products have expanded the field for metallic mesh. With the various technologies, we can add the artistic sense to the metallic mesh and punching metal products. It can provide the comfort to the people and enrich their feelings and emotion.

Speedy and Flexibility

Metal Work, Wire Technology & Development

Providing our advanced technology from the customers' point of view.
We are your partner for product development.

We will accommodate any needs in the any fields

How can we provide our hard material, metallic mesh, speedily in this age of rapid change? We will think flexibly to meet your needs and put more effort into increasing our variety of stock and developing human resources.

Contribute to the society by promoting activities for protecting the global environment.

Things we can do for the future of our planet

We will promote the environmentally friendly activities; developing the system which recycles and reproduce the condemned IK screen®, optimizing the spec of the filter used in the production machines to increase the quality of the products, reducing the condemned materials.

About Us

Company name

ISHIKAWA WIRE NETTING Co.,Ltd.

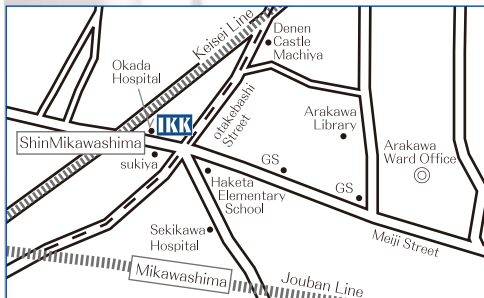

Tokyo Head Office

Japan, Tokyo, Arakawa-ku, Arakawa, 5 - 2 - 6

Tel +81 (3) 3807 9761, Fax +81 (3) 3807 9764

E-Mail : info@ishikawa-kanaami.com

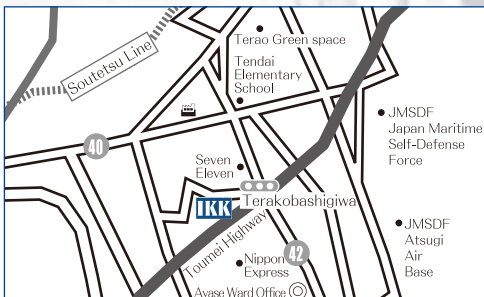

<http://www.ishikawa-kanaami.com>

Atsugi factory

Japan, Kanagawa, Ayase-shi, Kozono, 828-1

Tel +81 (467) 79 0789, Fax +81 (467) 79 0489

Capital:

30 million yen

Founding:

1922

Manufactured item:

Perfor-Art®

Design perforated sheets

IK Screen®

Wire mesh for extruder screens

Variety of automotive and industrial filters

Perforated metal, sieve, metal wire and processed metal

Content Sales:

Solution for industrial filter optimization

Metal sheet & wire products sales, research and development

Industrial machinery and equipment design and sales

Metal Construction, Real estate leasing

Officer:

President CEO Yukio Ishikawa

Executive chairman Ken Ishikawa

Managing Director Kaori Ishikawa

Licensing:

Construction licenses Tokyo governor allowed (General) No. 108 813

Eco-Action 21 Certification number 0004065

Authorization of Business Innovation Plan by Tokyo metropolitan 2011 No.186

Quality Management System ISO 9001(JIS Q 9001:2008)
